

Come join our dedicated team in providing high-quality inpatient and outpatient psychiatric care to an underserved, but appreciative, tropical island community! Move ahead with us!

Who Are We?

The medical staff of the Commonwealth Health Corporation provide medical care for a diverse multi-cultural community who reside on three islands that make up the U.S. Territory that is called the Commonwealth of the Northern Mariana Islands (CNMI). Our psychiatrists provide inpatient, outpatient, telemedicine and consultation services to the 50,000 people who call CNMI home.

Where Are We?

CNMI is part of an island chain located north of Guam in the western pacific. The three inhabited islands are Saipan, Tinian and Rota. Saipan is home to 85% of the population and the territory's only hospital. Psychiatric care is provided on Tinian and Rota by telemedicine and scheduled in-person clinic days. The islands are rich in history from the arrival of pacific islanders through World War II battles.

Who Works Here?

The medical staff is as diverse as the island's population. The staff include physicians, nurse practitioners and physician assistants from all ages and backgrounds. Many have just completed training and take advantage of the loan repayment program. Others are at the end of their careers and are looking for adventure. Some came just for a break from practicing on the mainland and decided to stay.

Where Do You Fit?

We are looking for Child, Adolescent and Adult Psychiatrists to join our current staff who are open to try something new. If you like adventure, relaxed island life, outdoor sports and travel you might fit in here. If you like seeing patients without being rushed and practicing medicine on your own terms then you might like it here. The positions at CNMI are eligible for the NHSC Loan Repayment Program and staff are eligible for the CNMI Federal Income Tax rebate as well. Your work will include outpatients, inpatients, consultations and on call duties that are done mostly by telephone.

How Can I Learn More?

The best way to learn more about working and living on a tropical island is to contact our current psychiatrists. We would be happy to answer your questions and tell you about our experiences.

*The work is meaningful. The patients are lovely and grateful!
It's psychiatric practice where it's needed and where you want to be!*

**Variety. Community. Adventure.
